Subject: Re: Ironbound Initiative?

Hi John,

Just a brief summary, the Ironbound is an environmental justice community in and adjacent to a heavily industrialized portion of Newark, NJ. To address community concerns regarding various pollutants, EPA has conducted air, rcra, toxics and water inspections at industrial facilities in the Ironbound area. For the water portion of the initiative, we inspected six facilities in November 2011 which resulted in the issuance of four Administrative Orders to address CWA/NPDES violations. Kinder Morgan Salt and Atlantic Salt, Inc. were issued AOs to address NJPDES Basic Industrial (5G2) Stormwater General Permit violations including failure to eliminate exposure of source material to stormwater. An AO was issued to Sims Metal Management for an unauthorized discharge of stormwater from a salt pile not authorized under the facility's current NJPDES Scrap Metal Processing (SM2) General Stormwater Permit. An AO was issued to International Used Auto Parts, Inc. to address NJPDES Scrap Metal Processing (SM2) General Stormwater Permit violations including failure to prevent spills from entering a catch basin.

If you have any questions, or would like more information feel free to give me a call.

Thanks,

Kim
